WHAT CHANGED

The brief lede ("Today is a mix of personal and professional activities.") moves *under* the date as a New York standfirst – not a paragraph to scan. The long editor's note becomes a quieter *two-paragraph column* instead of a block of body copy.

TYPE

Date *New York 56* / –2%, comma in *--ink-2*, italic month at 40. Lede *NY 19 light*. Counts: SF Mono caps with a serif numeral.

HIGHLIGHTS

Two list rows instead of icon-prefixed cards. Hairlines, mono labels, serif title with italic time. *Next up* reads as priority on its own; the calendar emphasis comes from order, not chrome.

SHELF

Spines fit all five at once in a 5-up row. Title truncates if needed; relative time renders as *Now / 17 h / 4 d*, not "AGO" all-caps to keep the shelf calm.

TOKENS

Canvas *--paper*; rule *--rule*; primary *--ink* on *--paper*. Search field uses *--surface*. No tinted blues – the app tint is *--ink*.
